

ORGANISATIONAL STUDIES COURSES

Major Objectives

The major objective for the introduction of the subject of Organisational Behaviour is to enrich the existing BA courses by adding a professional component, hence developing the necessary leadership qualities in the Bachelor of Arts graduates.

Curriculum

The curriculum for the subject of Organisational Studies shall extend over three academic years. In the first year, students take Organisational Studies as a professional subject along with two non-professional subjects. In the 2nd and 3rd years, students will major in Organisational Studies and minor in one of the subjects offered in the first year.

THE BACHELOR OF DEVELOPMENT STUDIES (BDVS)

Objectives

The programme introduces the student to the formulation of social, political, economic, environmental policy and appropriate technology together with spatial connotation. It deals with policy formulation at national, regional and local level but considerable emphasis is given to the local development and its implications to national and regional implementation at the grassroots.

The program also aims at developing skills to enable its graduates to:

- increase production, particularly in natural resources level to achieve sustainable development
- restructure rural economies by identifying all causes and areas of current underdevelopment
- improve the development and management of rural areas
- develop linkages between lower and upper circuit activities particularly in relation to industrial development
