DOCTOR OF PHILOSOPHY IN ECONOMICS (PHEC)

Objectives

The PhD Programme is intended to: provide the highest level of training in economics by coursework and thesis; strengthen teaching and research capacity in Uganda as well as in Sub-Saharan African countries; increase the pool of potential researchers and policy analysts; and reduce the need for Ugandans to train abroad when services of comparable quality can be provided at home at reasonable cost. Highly trained and specialized Economists are of paramount importance in the generation of knowledge for a better understanding of the economy and the design of appropriate policies to improve economic performance.

In contemporary societies, the most highly trained and specialized Economists are those who have studied and acquired the PhD degrees with Coursework and Dissertation from recognized Universities. The growing demand for Senior Economists outside academia and the under funding and decay of the universities have led many of those who remain in Africa to become consultants for international organizations. They are frequently over-committed. As a result, it is almost impossible

to build a community of African scholars who are able to identify upcoming economic issues, direct the development of relevant data and provide leadership to Masters' students. This situation perpetuates the excessive influence of non-African professionals in analyzing and formulating economic policies for the Continent.

It is therefore important that Makerere University Faculty of Economics and Management, the primary Economics Institution in Uganda undertakes the training of such Economists.

Programme Structure

Duration

The Programme integrates theory, tools and African applications into academic teaching, ensuring that the theory is firmly grounded on the empirical side. The 4 – year programme of study leading to the Doctor of Philosophy in Economics requires that a student takes four semesters of Coursework, does comprehensive examinations and also completes a PhD Thesis. During the first
